Re: Grading PS#9

STAFF MEETINGS...FRIDAYS, 12:30 p.m. PS117.

The answers to PS #9 are attached. After reviewing the problem sets I have decided we should grade problems PS9.3, PS9.6, and PS9.7 for 3 points. The maximum possible on the problem set is twelve points. The remaining three points are awarded on an all or nothing basis for completion of the remaining problems. Note: If the word 'Late' is written at the top of the Problem Set grade as usual but deduct 3 points from their total. Note: 'Late' means the student found me at the end of class or immediately after class. I will not accept Problem Sets more than a few minutes after class is over, and such cases will have a minimum of 3 points deducted from their score.

Please return the graded problem sets to your students in laboratory next week. Be sure to record the scores for each student.

Copies of the answers and the grading memo are on the WEB.

Grading the Review Problem Set

PS9.3 **3 points** 1 point each for parts a, b and c. R/W.

PS9.6 **3 points** 1 point each for parts b, d and e. R/W.

PS9.7 **3 points.** 1 point each for part a, b and d. In a award the point for all of the correct equilibrium concentrations. In part b award the point for the correct equilibrium constant value. In part d award the point as long as at least three of the five answers are correct.

3 points For attempting the remaining 7 problems. Remember each problem must have an answer, an attempt. If the student writes nonsense for any of the other answers deduct the 3 points.
