

## ADDITIONAL PAGE FOR ANSWERING QUESTION 3.

c. (i) Reducing Agent

$$(ii) \cdot \text{MnO}_4^- \text{ (aq)} \quad M = \frac{\# \text{ moles}}{\# e} = \text{moles} \cdot (M \cdot \# e)$$

$$\# \text{ moles} = (.0150 \text{ M})(.0178) = \boxed{2.67 \times 10^{-4} \text{ moles}}$$

$$\# \text{ moles} = 2.67 \times 10^{-4} \text{ moles MnO}_4^- \times \frac{5 \text{ moles C}_2\text{O}_4^{2-}}{2 \text{ moles MnO}_4^-} = \boxed{6.68 \times 10^{-4} \text{ moles}}$$

(iii) Total # of moles of  $\text{C}_2\text{O}_4^{2-}$ 

$$.345 \text{ g BeC}_2\text{O}_4 \times \frac{1 \text{ mole}}{97.012 \text{ g}} = .00356 \text{ moles BeC}_2\text{O}_4$$

$$\boxed{.00356 \text{ moles C}_2\text{O}_4^{2-}}$$

(iv) mass percent of  $\text{BeC}_2\text{O}_4$  in the impure sample**STOP**

If you finish before time is called, you may check your work on this part only.  
Do not turn to the other part of the test until you are told to do so.
